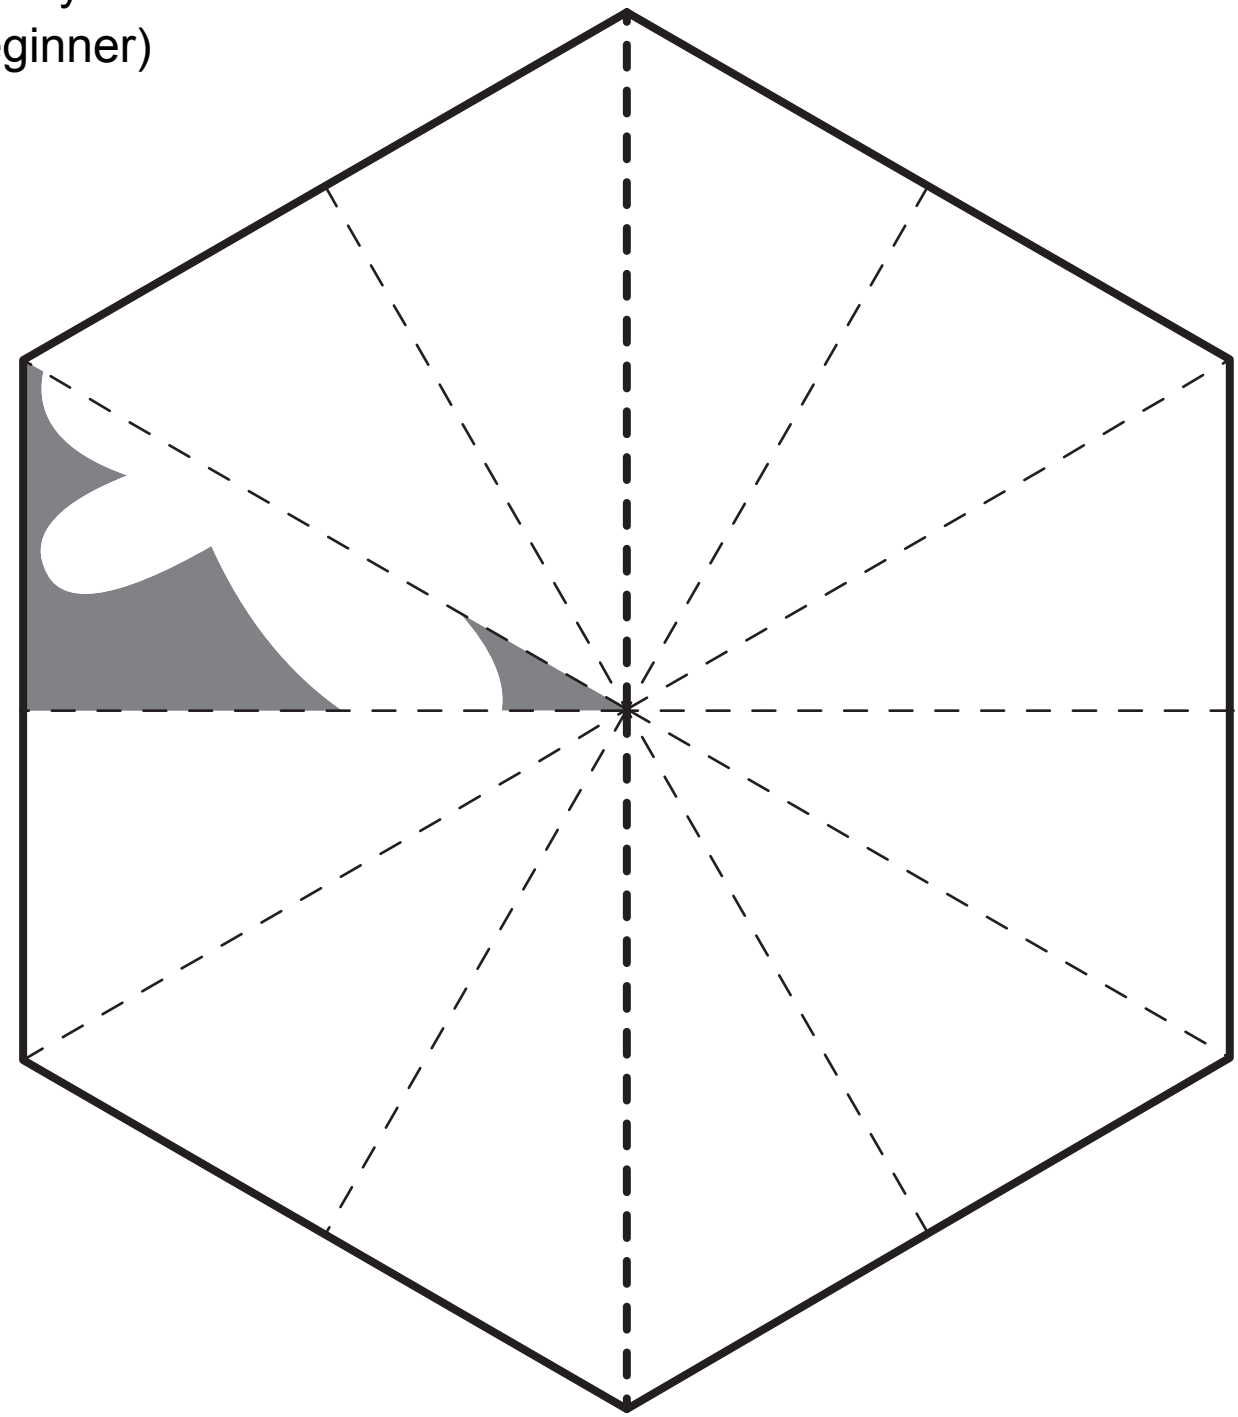
Make your own snowflake!
(Beginner)



Instructions

1) Print out the snowflake and cut around the solid lines.
2) Fold snowflake in half along the bold dotted line. Then, fold in half again. Then, fold two more times so that the gray design is facing upwards and in full view.
3) Carefully cut out the white part of the snowflake. The white part is what you need, the gray part you can throw away.
4) Carefully unfold your snowflake and Voila!
